EDUCATION

University of Texas at Austin 05/2027

Bachelor of Mechanical Engineering

Minor in Sales and Marketing

- GPA: 3.7/4.0
- Relevant Coursework: Acoustics Engineering, Dynamic System Controls, Data Science, Customer Marketing, Mechatronics, Contemporary Jazz, Differential Equations, FIRE Research Program

EXPERIENCE

Tool Engineering Intern, Boeing 05/2026 – 08/2026

- Identified and addressed a $1.44 million problem in 737 wing inspection processes. Solution saves $1.16 million for the current year, while significantly improving inspection reliability
- Designed optical measuring device, from concept to approval to use in manufacturing process, for inspections of 0.001” precision — 2 Patents Applied
- Designed, waterproof-tested, and approved bearing seal for mill fixture within first 2 weeks of internship

Electromechanical Technician Lead, Amazon / Ivy Technologies 06/2025 – 07/2025

- Led multiple cross-functional teams of 7–10 technicians to complete a $25 million installation of Amazon’s new automation-compatible chutes within a 6-week deadline, completing ahead of schedule
- Assembled 12 *Cardinal* robotic systems – Amazon’s 300-lb autonomous robotic arm designed to transfer packages from conveyor belts into carts for downstream robotic delivery
- Contributed to roles including mechanical assembly, electrical wiring, and final quality checks for 409 *Proteus* Cart Stations – Amazon’s self-driving robots used for transporting carts through the warehouse

Human Resources Lead ← Electronics Lead ← Student Staff, Texas Inventionworks 01/2024 – Present

- Hire and onboard 26 staff for UT Austin’s largest, 25,000 sqft, makerspace
- Teach manufacturing and engineering skills to 3,500+ students annually coming into the space
- Lead a team of 8 to conduct electronic workshops, build nights, and trainings to 1000+ students
- Trained in 5 fabrication areas – FDM, laser cutting, soldering, woodworking, machining

RESEARCH

Research Assistant, High Strain Rate Indentation On Nanoparticles 08/2023 – 10/2024

- Co-authored a published paper on velocity vs. deformation behavior of aluminum in micro-cold spray additive manufacturing processes
- Conducted simulations using LoneStar and LAMMPS, then analyzed and visualized simulation results with Ovito and Excel, consolidating large datasets into clear, publication-ready graphs
- Publication: Simulation of High Strain Rate Contact of Single Crystal Al Spheres

SKILLS

Soft Skills: Leadership, Quick Learner, Project Management, Inquisitive, Critical Thinking, Communication

Technical Skills: Product Development, Mechatronics, Python, Content Creation, Manufacturing, CAD

“Shoot for the moon. Even if you miss you’ll land among the stars.” - Norman Vincent Peale
